PRACTICAL SUBMISSION RECORD- A.Y. 2024-25

Class: SYMCA	Div: B	Course Code: MCA01604	Batch: S1
Semester: III		Course Name: Data Science Laboratory	
Name: Tejashree Vijay Dumasia		Roll No: 52117	
CO No: CO605.2		Assignment No: 09	

Title:

Use the FP-Growth Algorithm to perform Market Basket Analysis on a retail dataset. You will extract frequent item sets and generate association rules to discover purchasing patterns and help improve sales strategies

Code:

```
import pandas as pd
from mlxtend.frequent_patterns import fpgrowth, association_rules
from mlxtend.preprocessing import TransactionEncoder

try:
    df = pd.read_csv('groceries.csv').drop(columns=['Item(s)'])
    print("□ Dataset loaded successfully!")
except FileNotFoundError:
    print("□ Error: 'groceries.csv' not found. Please save the data to a file first.")
    exit()

transactions = []
for index, row in df.iterrows():
    basket = row.dropna().tolist()
    transactions.append(basket)

print(f"\nSuccessfully created {len(transactions)} transaction baskets.")
print("Example basket:", transactions[0])

te = TransactionEncoder()
te_ary = te.fit(transactions).transform(transactions)
df_encoded = pd.DataFrame(te_ary, columns=te.columns_)

frequent_itemsets = fpgrowth(df_encoded, min_support=0.005, use_colnames=True)
```

```
rules = association_rules(frequent_itemsets, metric="confidence", min_threshold=0.1)

print("\n--- Top 10 Association Rules (sorted by Lift) ---")
if rules.empty():
    print("No association rules found. Try lowering the 'min_support' or 'min_confidence' values.")
else:
    rules_sorted = rules.sort_values(by='lift', ascending=False)
    print(rules_sorted.head(10)[['antecedents', 'consequents', 'support', 'confidence', 'lift']])
```

Output:

```
✓ Dataset loaded successfully!

Successfully created 9835 transaction baskets.
Example basket: ['citrus fruit', 'semi-finished bread', 'margarine', 'ready soups']

--- Top 10 Association Rules (sorted by Lift) ---
      antecedents  ...  lift
262  (whole milk, tropical fruit)  ...  5.212371
