

PES’s Modern College of Engineering (An Autonomous Institute Affiliated to Savitribai Phule Pune University) Level 6.5: Second Year MCA (2024 Pattern)		
Course Code: SDV05601		Course Name: Skill Development–1 (SD-1)
Semester: III		
Teaching Scheme: Tutorial: 02 Hrs./ week	Credits: 02	Examination Scheme: Term work (TW): 50 Marks
Course detail sheet		
Course Objectives: ● To improve verbal and non-verbal communication skills of the students. ● To enhance the ability of the students in reading and listening. ● To develop skills of the students in writing different documents. ● To increase awareness of emotions and SWOC.		
Course Outcomes: On completion of the course, the student will be able to,		
CO609.1: Demonstrate effective communication through email writing, presentations, and video introductions.		
CO609.2: Construct a professional resume, SOP, LinkedIn profile, and GitHub portfolio showcasing individual skills.		
CO609.3: Evaluate personal strengths and areas of improvement using tools like SWOT and feedback from mock interviews.		
CO609.4: Participate in collaborative tasks and discussions to build teamwork, etiquette, and problem-solving abilities.		
Sr. No.	List of activities	CO Mapping
Week 1 Activity 1	1. Activity: Draft a professional e-mail requesting leave from your project manager. A professional e-mail is a formal message sent in a work or business context. It follows proper etiquette, clear structure, and respectful tone. It is used to communicate with colleagues, clients, employers, teachers, or other professionals. 2. Method: The students will write a handwritten draft professional e-mail for practice. Then they will type the same in Gmail and take a screen shot and its printout. The teacher will check the handwritten e-mail and screenshot printout. Images of both papers signed and dated by the	CO609.1

Second Year B. Tech. in Artificial Intelligence and Data Science (2024 Pattern)

	teacher would be uploaded in CO609.1 sub folder in the main folder of the student on Google Drive. 3. Outcome: The students will develop a skill to draft a professional e-mail. They will be able to demonstrate effective communication through e-mail writing.	
Week 2 Activity 2	1. Activity: Create a 3-slide presentation (PPT) on “My career goals in IT”. A PowerPoint presentation is a digital slideshow created using Microsoft PowerPoint, a popular software used for presenting information visually and effectively. Career goals are the objectives or targets a person sets for professional life. They give direction to a person’s career and help to focus on what a person wants to achieve over time. 2. Method: The students will prepare 5 slides. The 1st slide would be a title slide mentioning the subject code and full name of SD-1, topic name, roll no. and name of the student. The next 3 slides would be based on the main content of the above topic. The 5th slide would be a Thank You slide. All slides should have appropriate transition and animation features. The student will deliver a PowerPoint presentation in the class. The teacher will check a slides’ printout. 2 slides per page should be printed by the student. The image of signed and dated slide printouts would be uploaded in CO609.1 sub folder in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to identify the career goals in IT and develop a skill to prepare and demonstrate a PowerPoint presentation.	CO609.1
Week 3 Activity 3	1. Activity: Record a 2-minute video introducing yourself for a virtual job interview. The students should practice self-introduction for a virtual job interview because it helps them make a strong first impression, builds confidence, and sets the tone for the entire interview. Recording a self-video can be highly beneficial for students, especially when preparing for interviews, presentations, or public speaking. It provides a mirror-like feedback that helps improve both content and delivery. 2. Method: The students will write a self-introduction based on the points provided by the teacher. The student will prepare and present the self-introduction in the class. A video would be recorded. The teacher will check the written self-introduction. An image of signed and dated	CO609.1

Second Year B. Tech. in Artificial Intelligence and Data Science (2024 Pattern)

	handwritten self-introduction paper and a self-introduction video would be uploaded in CO609.1 sub folder in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to introduce themselves properly and confidently. They would be able to demonstrate effective communication through video introduction which is useful for a job interview.	
Week 4 Activity 4	1. Activity: Create a professional resume in a given template. A resume is a formal document that summarizes a person's education, experience, skills, and achievements to help you apply for a job, internship, or academic opportunity. It acts as a person's professional profile for potential employers. There are differences between Biodata, CV, and resume. 2. Method: The students will create a professional resume in MCOE's placement template as well as in an additional template of student's choice. The teacher will check both the printouts. Students will upload the images of both signed and dated templates in CO609.2 sub folder in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to create a professional resume in an appropriate format. They will also be able to understand the difference between a biodata, CV, and Resume and would be able to construct the same as per the requirement of the company.	CO609.2
Week 5 Activity 5	1. Activity: Build a simple portfolio website or GitHub project profile page. A portfolio website is a personal online space where you showcase your work, skills, achievements, and professional identity. It's especially useful for students, job seekers, freelancers, artists, developers, and designers to demonstrate their capabilities to potential employers, clients, or collaborators. 2. Method: The students will prepare a GitHub project profile page. The teacher will check the printout of a screenshot of the page. The student will upload the image of a signed and dated screenshot and a link in CO609.2 sub folder in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to acquire a skill of developing any website or a GitHub project profile page.	CO609.2

Second Year B. Tech. in Artificial Intelligence and Data Science (2024 Pattern)

Week 6 Activity 6	1. Activity: Create or update your LinkedIn profile and share the profile link. A LinkedIn profile is a person's professional online identity — like a digital resume and networking tool combined. It's used to showcase skills, education, experience, and achievements of a person, and to connect with other professionals, recruiters, and companies. 2. Method: The students will create or update a LinkedIn profile and take the printouts of the screenshots of LinkedIn profile and link. The students will upload the images of signed and dated printouts of profile and link in CO609.2 sub folder in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to create or update LinkedIn profile which will help them in getting a job and other benefits.	CO609.2
Week 7 Activity 7	1. Activity: Conduct a SWOT analysis on yourself and present the findings. A SWOT analysis is a strategic planning tool used to evaluate the Strengths, Weaknesses, Opportunities, and Threats related to a person, project, or organization. 2. Method: The students will fill the SWOT template. The teacher will check the template. The signed and dated template would be uploaded in CO609.3 sub folder in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to gain self-awareness. They would be able to evaluate personal strengths and areas of improvement.	CO609.3
Week 8 Activity 8	1. Activity: Prepare for and attend a mock interview conducted by peers or faculty. Practicing mock interviews helps students improve their confidence, communication skills, and readiness for real interviews. 2. Method: The student has to appear before a peer interview panel or a teacher for a mock interview. A video of the interview would be recorded. Non-technical and technical questions would be asked to the students. All the students will study the questions to be asked in the interview and how to answer the questions in the interview and prepare for both. The video would be uploaded in CO609.3 sub folder in the main folder created by the student on Google Drive.	CO609.3

Second Year B. Tech. in Artificial Intelligence and Data Science (2024 Pattern)

	3. Outcome: The students will be able to understand the areas of improvement from the feedback of the peer interview panel or the teacher.	
Week 9 Activity 9	1. Activity: Prepare a mind-map on “Qualities of a Good Team Member.” 2. Method: The students will draw a mind map for the above. The signed and dated mind map’s image will be uploaded by the students in CO609.3 sub folder in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to develop a skill of generating different ideas through a mind map.	CO609.3
Week 10 Activity 10	1. Activity: List 5 workplace scenarios and response using a proper workplace etiquette. Workplace Etiquettes refer to the set of unwritten rules or socially acceptable behaviors that help maintain a respectful, professional, and productive work environment. Practicing proper etiquette can improve communication, collaboration, and job satisfaction. 2. Method: A list of workplace scenarios would be provided to the students by the teacher. The students have to select any five workplace scenarios and suggest suitable workplace etiquettes to be followed. A handwritten paper would be checked by the teacher. A signed and dated paper’s image would be uploaded in a sub folder named CO609.4 in the main folder created by the student on Google Drive. 3. Outcome: The students will be able to develop a skill of applying suitable etiquettes in a given situation.	CO609.4
Week 11 Activity 11	1. Activity: Participation in a group discussion: “AI is replacing human jobs – agree or disagree”. A Group Discussion (GD) is a method used to assess a candidate’s communication skills, teamwork, critical thinking, and leadership qualities. It is commonly used in campus placements, competitive exams, and admissions to professional courses. 2. Method: The students will form a group of 4 and will discuss on the above topic. A video of the group discussion would be recorded. The students will write the summary of group discussion on a paper which would be checked by the teacher. A signed and dated paper’s image as well as the video would be uploaded by the student in a sub folder	CO609.4

Second Year B. Tech. in Artificial Intelligence and Data Science (2024 Pattern)

	named CO609.4 in the main folder created by the student on Google Drive. 3. Outcome: The student will develop the skills to participate in collaborative tasks and discussions.	
Week 12 Activity 12	1. Activity: Role-play a mock team meeting with assigned roles (Team lead, Developer, Tester) Role play is an activity where participants act out specific roles in a simulated situation. It is commonly used in education, training, and recruitment to develop communication, problem-solving, empathy, and decision-making skills. 2. Method: The students will form a group of 4 and will present a role-play. A video of the role-play would be recorded. The students will write a summary of role played by a student which would be checked by the teacher. A signed and dated paper's image as well as the video would be uploaded by the student in a sub folder named CO609.4 in the main folder created by the student on Google Drive. 3.Outcome: The student will develop the skills to participate in collaborative tasks and discussions to build teamwork, etiquette, and problem-solving abilities by performing a role-play.	CO609.4

Criteria for course evaluation:

Sr.no.	Particulars	Marks
1	CO1 evaluation – Extempore speech	10
2	CO2 evaluation – Website preparation	10
3	CO3 evaluation – SWOC analysis	10
4	CO4 evaluation – Group discussion	10
5	Attendance	10
	Total	50

**Rubrics for tutorial evaluation:**

Sr.no.	Tutorial	9-10 marks	7-8 marks	5-6 marks	3-4 marks
1	Extempore speech	Excellent content, confidence, body language	Good content, confidence, body language	Average content, confidence, body language	Poor content, confidence, body language
2	Website preparation	Excellent features, content, aesthetics, utility	Good features, content, aesthetics, utility	Average features, content, aesthetics, utility	Poor features, content, aesthetics, utility
3	SWOC analysis	Excellent understanding, content, presentation	Good understanding, content, presentation	Average understanding, content, presentation	Poor understanding, content, presentation
4	Group discussion	Excellent understanding, content, confidence, body language	Good understanding, content, confidence, body language	Average understanding, content, confidence, body language	Poor understanding, content, confidence, body language
