WordPress

1. What is WordPress?
2. What are the main features of WordPress?
3. What is the main difference between WordPress posts and pages?
4. What are widgets in WordPress?
5. How can we improve the performance of a WordPress site?
6. How do developers create a widget in WordPress?
7. How do you handle database management in WordPress?
8. Can you explain how to use the WordPress REST API?
9. Explain moderate comments in WordPress.
10. How to add a new menu in WordPress?

Unit IV (Angular JS & JQuery)

AngularJS

1. List Core features of Angular JS with diagram.
2. List various parts of Angular JS.
3. Define MVC architecture with respect to AngularJS.
4. Explain AngularJS Controllers with example.
5. Explain AngularJS Modules with example.
6. Explain any three filters with example.
7. What are directives? Name some of the most commonly used directives in AngularJS application
8. What is data binding in AngularJS?
9. What are the benefits of AngularJS?
10. What are different forms of form events?

JQuery

1. Explain JQuery in detail.
2. Explain the concept of JQuery with selecting, creating, appending elements.
3. What are events in jQuery?

4. What are the selectors in jQuery? How many types of selectors in jQuery?
5. What is event delegation in jQuery?
6. What are the jQuery effects?
7. What are the advantages of jQuery?
8. What is an attribute in jQuery?
9. What is jQuery UI?
10. Is jQuery a JavaScript or JSON library file?

Unit V (PHP & MySQL)

1. Discuss features of PHP.
2. List out predefined classes in PHP.
3. What is the use of header () function in PHP?
4. How we get the browser properties using PHP?
5. What is the difference between require and include?
6. What is session? How we can register variables into session?
7. Write short note on Cookie handling.
8. Explain the mail() function in PHP to send an email
9. What are cookies? What can you do with it?
10. Explain database connectivity in PHP with reference to MySQL

MySQL

1. Explain how MySQL database is managed.
2. What is the use of phpMyAdmin in MySQL?
3. How to create a database in MySQL and how to create a table in it? Also explain How to insert data into it.
4. Name MySQL operators
5. Explain of the following PHP/MySQL function (i) mysql_query() (ii) mysql_error (iii) isset()
6. How many different tables are present in MySQL?
7. What are the advantages of using MySQL?
8. Can you explain the difference between MyISAM and InnoDB storage engines?
9. What does the JOIN statement do in MySQL? Explain the different types of joins.
10. What is the difference between mysql_fetch_array and mysql_fetch_object?

Unit VI (Web Services)

1. Discuss the role of SOAP web service in details
2. What are Web services? Explain different types of Web Services.
3. Differentiate between SOAP and REST.
4. What is semantic web service? Name any four web services technologies
5. What is WSDL? Highlight its significance.
6. What is RPC? List out the component of web service architecture.
7. What is semantic web service? 7. Name any four web services technologies
8. What is JAX-RPC? Explain in detail with the help of diagram.
9. Explain the UDDI Registries? What are the uses of UDDI Registry?
10. Describe the WSDL Structure and its life cycle in detail?
